Objective: Predicting flight fare price based on the features like airline, date of journey, source, destination, route, dep time, arrival time, duration, total stops etc.

About Dataset: The dataset contains information about airline, data of journey, source, destination, route, dep time, arrival time, duration, total stops etc.

Bench marks:

1. Importing Dataset
2. Analysing data
3. ML Model Selection
4. Deployment
5. Conclusion and future scope

Expected date of project completion: 10th may 2021
